

PORTABLE ULTRASOUND SYSTEMS TO BUY:

PORTABLE ULTRASOUND OPPORTUNITIES TO BUY:

Are you looking for a 3D/4D portable ultrasound machine? A 2D machine for abdomen and gynecology? How about a vascular ultrasound for carotid, thyroid, small parts, venous? Are you unsure of the costs of a portable ultrasound scanner? Do you need a basic ultrasound understanding of which machines scan what application? Are you a Veterinarian seeking a basic portable or do you need to do basic cardiac scanning too? We will have many answers here for the cardiologist, vascular surgeon, veterinarian, obstetrician and more. Here are some basics and ratings on the portable units.

[Sonoscape A6](#) – best bang for the buck. Inexpensive 2D, black and white portable. Great for abdomen or gynecology scanning. Starts around \$4,000 and goes up with probes.

[Sonoscape S2](#) – economical yet slightly bulky, color Doppler portable. Mid-range imaging. Great for abdomen, gynecology and vascular studies. Starts around \$8,000 and goes up with probes.

[Sonoscape X5](#) – Midrange imaging, just below the GE Logiq e. Offers a sleek laptop design, radiology (ob/gyn/vascular) applications. Starts around \$15,000 and goes up with probes.

[Sonoscape S9 Pro](#) – Higher end portable laptop, shared service including cardiac but not stress echo. Keyboard for more effective key punching versus the sensitive touch screen. Ob/Gyn/Vasc/Cardiac. Priced around \$20,000 and goes up.

[GE Logiq e](#) – well-known portable in a long line of GE products. Can be configured with or without cardiac and stress. Many software levels (BTxx) to choose from depending on your needs and your budget. Slim design portable, one of the best features. Many imaging enhancements and features to provide the tools you need for your practice. Added High Frequency Linear Probe to NextGen version.

[GE Voluson I](#) – best in market 4D portable ultrasound. Still holds its ground in the industry. Long time, well-known and reputable 4D portable. Offered new or refurbished with different levels of software to choose from that will generate great results but just may save the pocket a little when needed.

[GE Vivid I](#) – great cardiac portable ultrasound machine. Who doesn't know about the Vivid i? Fully-functioning cardiac machine with stress, TVI, TT. Being replaced with newer models but still available.

[GE Vivid q](#) – a step up from the Vivid I with a little more power along with quantitative measurements like Auto EF and more or less mimics the capabilities of the Vivid 7 line. Great machine, costs more, so the audience is more channeled.

GE Vivid iq – newest machine, tablet/ touch screen interface, flip down display. Advanced – 2D TEE, ICE² Adds the 4D cardiac option to the list to complete with the new Philips CX50.

[Chison Ebit60](#) or Vet – New release portable scanner for human or vet. This is a 15", 5 inch thick portable unit somewhat similar to the Sonoscape S2 but with a few enhanced features like tilt monitor, faster processor, better imaging. Starts around \$16,000 and goes up with probes. 14x15x5 inches

PORTABLE ULTRASOUND SYSTEMS TO BUY:

[Chison Sonobook](#) – a new introduction the laptop portable line. Competes with Philips CX50, Vivid I and is better than Sonoscape S9. Durable construction, enhanced imaging, slim design, shared service including cardiac and stress echo, TEE probes, and high frequency linear probes for MSK, Picc Line, Venous, and more.

[Philips CX50](#) – 3D cardiac echo portable. Philips is designed for cardiologists but is just as good with vascular too. Similar size to the SonoBook but about \$15,000-\$20,000 more. Easy to use, durable but could cost a bit if a board fails and needs replacing.

[Samsung HM70A](#) – considered the hybrid of hardware and software working cohesively to generate that crystal clear picture that the ClearVue delivers. Not enough feedback to be unbiased on this system.

[SIUI CTS-800](#) – this is one of the smaller handheld portables used in the market with just a 7" LCD screen. It's for outdoor use and on farms, and is water resistant, water proof. Used in the Veterinary market for horses, cows, and farm animals.

[Edan DUS60](#) – slightly bulky but user friendly, portable black and white. Similar to the Sonoscape A6 but easier to use and more durable but may cost slightly more. Great for ob/gyn and with veterinary software, the vet market. Clear images, hard drive (A6 doesn't offer), Dicom, Pulsed Wave imaging packed in this economical portable that will do great for what you need.
